

OSVALDO PINEDA

Senior Fullstack Engineer | System Architect Mexico City, Mexico (GMT-6) |
luisosvaldopineda@gmail.com | [linkedin.com/in/osvaldo-pineda](https://www.linkedin.com/in/osvaldo-pineda) | github.com/osvaldopineda

PROFESSIONAL SUMMARY

Senior Software Engineer with 7 years of experience architecting scalable web applications. Expert in the React ecosystem (Next.js, TypeScript), robust backend systems (Node.js, Python, gRPC), and Headless CMS (Contentstack) migrations. Highly specialized in strict Web Accessibility (WCAG 2.1/2.2 AA), secure fintech platforms, and leveraging AI-assisted workflows to accelerate delivery in high-scale environments.

CORE TECHNICAL SKILLS

- **Frontend Mastery:** React.js, Next.js, TypeScript, JavaScript (ES6+), Tailwind CSS, Redux, React Hook Form, Web Accessibility (WCAG 2.1/2.2 AA, ARIA), Responsive Design.
- **Backend & APIs:** Backend & APIs: Node.js, Express.js, Python, FastAPI, Django, RESTful APIs, GraphQL, gRPC, WebSockets, JWT Authentication.
- **Data & CMS:** PostgreSQL, MongoDB, Prisma, Contentstack (Headless CMS), RealmDB.
- **Cloud Infrastructure & DevOps:** AWS (EC2, S3, RDS, Lambda), Docker, CI/CD (GitHub Actions), Git, Vercel, Jest, Cypress (E2E/Integration).
- **Modern Tools:** AI-Assisted Development & Agentic Workflows (Cursor, Google Antigravity, Claude Code, ChatGPT, Prompt Engineering).

PROFESSIONAL EXPERIENCE

Senior Software Engineer | Google (via Qualitest) Sep 2025 – Mar 2026

- Resolved high-priority Web Accessibility (WCAG 2.1/2.2 AA, ARIA) defects and engineered UI enhancements directly for the **Google Search Engine**, ensuring compliance and inclusive UX for millions of daily active users.
- Engineered high-performance microservices communication using **gRPC**, seamlessly integrating frontend components with Google's proprietary internal infrastructure.
- Collaborated in a highly scaled, fast-paced environment to establish strict cross-browser compatibility, responsive behavior, and robust testing pipelines.

Senior Frontend Engineer | Unosquare Jun 2024 – Aug 2025 | Enterprise Clients: Stitch Fix, Life.Church

- Architected high-impact features for platforms serving millions of users, focusing on modern React/Next.js infrastructure and rigorous performance optimization.
- **Stitch Fix Project:** Spearheaded the frontend refactoring using **GraphQL** and successfully migrated the content architecture to **Contentstack (Headless CMS)**, improving overall user engagement by 25%.
- **Life.Church Project:** Directed a complete frontend redesign using **Tailwind CSS** and a modular architecture, building 20+ reusable UI components deployed via **Vercel**.

- Conducted data-driven A/B testing via Amplitude, achieving a 15% conversion improvement while maintaining >85% test coverage with **Jest** and **Cypress**.

Senior Fintech Consultant | Invex Bank & Compartamos Bank May 2023 – May 2024

- Partnered with leading Latin American financial institutions to architect and deliver secure, compliance-heavy banking applications leveraging a robust **AWS** cloud infrastructure to ensure high availability.
- **Invex Bank:** Led legacy migration to a micro-frontend architecture serving 50k+ customers. Engineered 15+ widgets with React/TypeScript ensuring strict PCI DSS compliance and built secure APIs with Node.js, **PostgreSQL**, and **JWT Authentication**.
- **Compartamos Bank:** Architected a financial inclusion platform featuring offline-first capabilities using React Native and encrypted RealmDB. Developed high-concurrency backend APIs with **Python (Django/FastAPI)** implementing hexagonal architecture, and architected scalable deployment pipelines on AWS.

Frontend Tech Lead | Fondeadora for Business May 2021 – May 2023

- Engineered a B2B fintech platform from the ground up using React and Redux, rapidly scaling to serve 5k+ business customers.
- Developed a comprehensive admin panel using **React Hook Form**, featuring RBAC authentication, transaction history, and digital card management.
- Implemented a robust payment system handling \$1M+ monthly transactions, utilizing **WebSockets** for real-time processing and **MongoDB** for flexible data storage.
- Optimized CI/CD pipelines utilizing **Docker**, reducing deployment time by 40%, and actively mentored junior developers.

Frontend Developer | ProsperIA Feb 2019 – May 2021

- Architected an AI-powered medical MVP using React and Python to facilitate ophthalmologist diagnosis workflows.
- Integrated AI APIs handling 1GB+ medical image processing, optimizing **pipeline performance** and system scalability by 50% through Context API and Higher-Order Component patterns.
- Managed version control and collaborative workflows using **Git** across distributed teams.

EDUCATION & CERTIFICATIONS

- **Bachelor's in Computer Engineering** | Universidad de América del Norte
- **Professional Certifications:** React Advanced Patterns, Node.js Application Security, AWS Cloud Practitioner (In Progress).

LANGUAGES & AVAILABILITY

- **Languages:** Spanish (Native), English (Fluent / C1 Professional working proficiency).
- **Availability:** Immediate availability. Open to B2B, remote global collaboration, and relocation/sponsorship opportunities.
